**Subject:**

SSVEC 69 kV line and substation

**(Support)**

Dear Commissioners,

In reading the news article in the local paper it seems that SSVEC has done everything they could to meet a few people with unreasonable requests.

They claim that SSVEC wants to serve two mines. SSVEC says they are out of their Service area. When I look at the map on your website at the territories for utilities, SSVEC is telling the truth.

When I bought property my title company made me aware of all easements on the property. Don't blame SSVEC and make them pay for what their title company did or did not do.

Enough is enough, SSVEC has provided data and reports from professional engineers to support their project and all these other are proposing solutions that defy the laws of physics (not to mention common sense).

The article in the paper said that these folks testified in the last hearing that it is about location of the line not renewable energy. It too bad their neighbors didn't take them to court to keep them from building their homes because that is certainly more intrusive to the rolling vistas and wildlife than a power line.

I fully support SSVEC in this and hope you will put this to rest at the open meeting.

LET THEM BUILD THE LINE!

Janet
